

TOOL // Guided Reading Observation and Tracking Tool

What is the tool?

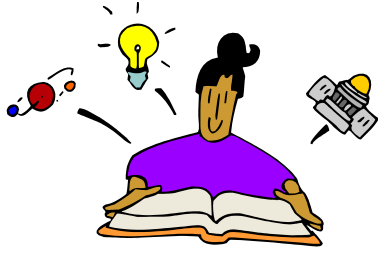

This is a tracking sheet for observation.

What is it used for?

This tool is used during guided reading to record observations and identify a learning goal for individual students.

How do you use it?

The teacher has a sheet for each student. The chart includes an area for recording the date, the level, title of the book read and teacher observations. At the top is an area where the teacher and the student can set a goal. Subsequent observations can indicate if the goal was met and a new goal can be set.
