

TOOL // Making Inferences Template Using APE

What is the tool?

Making Inferences Template Using APE Formative Assessment

What is it used for?

The template provides students with the success criteria at the top of the page to guide students when they are demonstrating their ability to make inferences from a text.

How do you use it?

The book title that the students are working on is typed in the top . The Success Criteria using the acronym APE is in a box at the top of the page (**A**nswer the question with a simple inference, **P**rove your answer with evidence from the text, **E**xtend your answer by making connections to understand the text better). This provides a guide for the students as they write their response to the assessment question. Pictorial representations of each step that are consistent with what has been used in the teaching learning of the strategy are included to support students. The APE acronym is displayed in the room with monkey pictures to be available for other reading tasks.
